

Raj Kumar Mandal

Java Backend Developer • Spring Boot • Microservices • REST APIs • AWS

Email: rajkumar.sidgs@gmail.com | Phone: +91-7903330321 | LinkedIn id- [Raj kumar Mandal](#) | [LinkedIn](#)

Professional Summary

Java / Spring Boot Developer with 4 years of experience designing scalable backend systems across **banking and telecom & Marketing domains**. Experienced in building **microservices-based architecture**, high-performance APIs, and distributed systems. Proven success improving **API performance by 30%** and reducing **production downtime by 20%**. Strong expertise in **Java 8/11/17, Spring Boot, AWS, Docker, Kubernetes, REST APIs, and Database optimization**

Technical Skills

Languages & Frameworks Java 8/ 17/ 21 • Spring Boot • Spring MVC • Hibernate/JPA • Multithreading • CompletableFuture • Virtual Threads • Stream API • Records • Functional Interfaces

Microservices	REST APIs , Microservices Architecture , API Gateway , OpenFeign , Resilience4j,Circuit Breaker , WebClient , SOAP , OpenAPI/Swagger, GraphQL, gRPC,Saga Pattern
Cloud & DevOps	AWS (EC2, ECS, EKS, Lambda, S3, RDS, SQS, CloudWatch) , Docker ,Kubernetes , Terraform (basics) , Jenkins , GitLab CI/CD
Databases	MySQL, Oracle, NoSQL, PL/SQL, Query Optimization, Indexing, Schema Design ,Redis Cache , Vector Database
Security	Spring Security OAuth 2.0 • JWT • SSL/TLS • HTTPS • SSO • Authentication & Authorization
Front-end Basics	ReactJS, Node.js, JavaScript, Typescript, JSP, HTML5, CSS3, Bootstraps,
Tools & Monitoring	Jira, Git/GitLab, Postman, IntelliJ, Eclipse, STS, SonarQube, Dynatrace, Apigee, Swagger, Grafana, OpenTelemetry
Testing	JUnit5, Mockito, SonarQube, Maven, Gradle, Postman, Git, JIRA, Confluence
Other Concepts	REST APIs, Multithreading, OOP, Design Pattern, OAuth2.0, API Gateway, Troubleshoot, Data Structure and Algorithms, MVC. Apache Kafka, RabbitMQ, Event-Driven Architecture, Spring Batch, SOLID Principles, Design Patterns, OOP Concepts, Distributed Systems
Domains	Banking & Fintech, Telecommunications, Enterprise SaaS.
AI & Automation	Spring AI • GitHub Copilot • OpenAI API • LLM Integration (basics)
Methodologies	Agile/Scrum, Sprint Planning, Daily Standups, Retrospectives, Confluence Documentation

Professional Experience

Software Engineer – Lumen Technologies | Bengaluru || Dec 2024 – Present

(Remotes)

Project: C2QF (Copper to Quantum Fiber) – Telecom platform enabling customers to upgrade internet services from copper to fiber with address validation and slot booking.

Roles and Responsibilities –

- **RESTful microservices** using **java 17/21** and **Spring Boot 3.x** to orchestrate end-to-end telecom service migration workflows (**address validation, slot booking,Plan Type, Activation**), supporting thousands of daily upgrade requests.
- Built and maintained **microservices architecture** for scalable backend systems.
- Designed and optimized **MySQL/Oracle** databases for performance
- Implemented **Spring Batch jobs** for high-volume data ingestion and transformation, reducing manual processing overhead by automating bulk record handling.
- Integrated **Apache Kafka** for event-driven communication between services.
- Containerized applications using **Docker** and deployed on **Kubernetes**.
- Managed **CI/CD pipelines** using **GitLab**, enabling automated build and **deployment**.
- Collaborated in **Agile environment** (daily stand-ups, sprint planning, releases).
- Performed **code reviews**, ensuring code quality and best practices Using SonarQube
- **Debugged and Resolved critical production incidents** By analyzing systems Logs and handled distributedtrance

Java Developer – SID Global Solutions | Bangalore | Nov 2022 – Jul 2024

(Hybrids)

Project: BDOPay 2.0 (Digital Banking Platform – Philippines)- Digital payments platform supporting online transactions, QR payments, and bill payments for millions of users

Roles and Responsibilities -

- Developed and **maintained secure**, high-throughput **REST APIs** using **Spring Boot** and **Java 8** to power digital **payment flows** including QR payments, bill payments, and online transactions for millions of users.
 - Integrated APIs with third-party systems using **OpenFeign** and **REST templates**. Improved reliability with **AWS (EC2, ECS, EKS, Lambda, SQS, CloudWatch)**.
 - **Reduced API response latency** by 30% by implementing **Redis caching**, **optimized SQL queries**, and **connection pooling strategies**.
 - Monitored production issues using **Dynatrace & CloudWatch**,
 - Implemented **CI/CD deployments** with **Docker & Kubernetes**, reducing downtime by 20%. Ensured application security with OAuth 2.0 and JWT SSL/TLS, and HTTPS.
 - Enhancement and **optimization**: Collaborate with development teams to implement improvements and optimizations in the backend systems for better performance, scalability, and Maintainability.
 - Maintained comprehensive document of support processes troubleshooting procedures and solution for future reference Using **Jira confluence** and **Swagger**.
 - Fix of defects communicated by testing Teams
-

Trainee Software Engineer - Tanama Software Pvt. Ltd. | Bengaluru - March-2022-Oct-2022

(Remotes)

Project: Tradent 2.7.0- Customer management system that consolidates leads, sales, and customer data from multiple sources.

- Built and maintained web application modules using **Java**, **Spring Boot**, **Hibernate/JPA**, and **MVC architecture** as part of a **cross-functional Agile team**.
 - Created **optimized SQL queries** and reports using **iText PDF API**.
 - Supported **microservices deployment** on **AWS** with **CI/CD pipeline**.
 - Set up **MySQL database** & created database schema.
 - Exposed and consumed **RESTful web services**, implementing **controller**, **service**, and **repository layers** following clean code and **SOLID principles**
 - Exposed and consumed **RESTful web services**.
 - Built UI components using **JSP** and **JSTL**, and implemented email notification services for automated customer communications.
 - Developed email sending services in **Util Layer**.
 - Resolved defects identified during QA cycles, ensuring application stability and quality.
 - Attend Daily stand-up meeting.
-

Education

- Postgraduate in Computer Application (MCA) – Netaji Subhash Engineering College, Kolkata (WBUT West Bengal)- 2020
 - Graduation in Computer Application (BCA) -Marwari College Bhagalpur, Bihar (TMBU Bhagalpur Bihar)- 2016
-

Key Projects:

- **C2QF (Copper to Quantum Fiber)**: Built microservices architecture for telecom service migration, enabling thousands of users to upgrade seamlessly from copper to fiber broadband. Integrated Spring Batch for bulk data processing and AWS for scalable deployment.
- **BDOPay 2.0**: Developed secure, high-performance backend APIs for one of the largest banks in the Philippines, supporting millions of daily transactions. Leveraged Docker, Kubernetes, and AWS for containerized cloud deployment with improved uptime and scalability.

Raj Kumar Mandal

Java Backend Developer • Spring Boot • Microservices • REST APIs • AWS

Email: rajkumar.sidgs@gmail.com | Phone: +91-7903330321 | LinkedIn id- [Raj kumar Mandal](#) | [LinkedIn](#)

Key Achievements

- Reduced **bugs** by 14% by improving code quality with **SonarQube** and **Junit5**.
- Enhanced backend system performance and reduced downtime by 20% via **DB/API optimization**.
- Reduced **API response time by 30%** through **optimized query** handling and **caching strategies**.
- Increased system scalability and availability by migrating core modules to **microservices** on **AWS (Docker + Kubernetes)**.
- Successfully delivered enterprise banking & telecom projects (BDOPay 2.0, C2QF) in **Agile teams of 7–16 members, ensuring 100% client satisfaction**.
