Raj Kumar Mandal

Java /SpringBoot Developer

Email: rajkumar.sidgs@gmail.com | Phone: +91-7903330321| LinkedIn id- www.linkedin.com/in/raj-kumar-mandal

Professional Summary

Enthusiastic and reliable Java Developer with Approximately four years of experience in designing and developing scalable enterprise applications. Expert in Java, Spring Boot, Hibernate JPA, and Microservices, with strong exposure to AWS, Docker, Kubernetes, and monitoring tools like Dynatrace. Proven ability to optimize systems, troubleshoot production issues, and deliver secure, high-quality solutions in banking and telecom domains.

Technical Skills

Languages & Frameworks	Java (8/11/17), J2EE, Spring Boot, Spring Batch, Hibernate JPA, RESTful APIs, Microservices
Cloud & DevOps	AWS (EC2, ECS, EKS, S3, RDS, Lambda, CloudWatch), Docker, Kubernetes, CI/CD
Databases	MySQL, Oracle
Frontend	Angular, JavaScript, HTML5, CSS3, JSP
Tools & Monitoring	Jira, Git/GitLab, Postman, IntelliJ, Eclipse, STS, SonarQube, Dynatrace, Apigee, Swagger
Testing	JUnit5, Mockito,
Other Concepts	Rest API, Multithreading, Opps, Design Pattern, OAuth2.0, API Gateway, Troubleshoot, Data Structure and Algorithms, MVC,

Professional Experience

Software Engineer – Lumen Technologies | Dec 2024 – Present

*Project: C2QF (*Copper to Quantum Fiber*) – Telecom platform enabling customers to upgrade internet services from copper to fiber with address validation and slot booking.*

Roles And Responsibilities -

- Implemented **Spring Batch** for bulk data processing, improving data handling efficiency.
- Designed REST APIs and database schemas (**MySQL/Oracle**).
- Implemented validation, backend logic, and integrated APIs with UI.
  Contributed to Agile methodology and **AWS** deployments.
- Utilizing **Restful** for Webservices Using **Regular Expression** to Perform from validation.
- Developed application Based on **Microservice**s concepts
- Handling Monolithic application flow setting up applications. Properties file.

Java Developer – SID Global Solutions | Nov 2022 – Jul 2024

Project: BDOPay 2.0 (Digital Banking Platform – Philippines)- Digital payments platform supporting online transactions, QR payments, and bill payments for millions of users

Roles And Responsibilities -

- Developed scalable microservices and **REST API**s using **Spring Boot**.
- Integrated APIs with third-party systems using **Feign** clients and REST templates. Improved reliability with **AWS (EC2, ECS, EKS, Lambda, SQS, CloudWatch,).**
- Monitored **production issues** using **Dynatrace, CloudWatch**,
- Implemented **CI/CD** deployments with **Docker & Kubernetes**, reducing downtime by 20%. Ensured application security with **OAuth 2.0, SSL/TLS**, and HTTPS.
- **Enhancement and optimization:** Collaborate with development teams to implement improvements and optimizations in the backend systems for better performance, scalability, and Maintainability.
- Documentation: maintain comprehensive document of support processes, **troubleshooting** procedures and solution for future reference Using **Jira confluence, Swager**
- Fix of defects communicated by testing Team.
- Attend Daily stand-up meeting.

Raj Kumar Mandal

Java /SpringBoot Developer

Email: rajkumar.sidgs@gmail.com | Phone: +91-7903330321| LinkedIn id- www.linkedin.com/in/raj-kumar-mandal

Trainee Software Engineer -Tanama software pvt.ltd .

Project: Tradent 2.7.0- Customer management system that consolidates leads, sales, and customer data from multiple sources.

- Developed and maintained web applications using Java, Spring Boot, Hibernate
- Implementing MVC architecture while developing the code
- Created optimized SQL queries and reports using iText PDF API. Supported microservices deployment on AWS with CI/CD pipeline.
- Setting up MySQL database & creating database schema
- Developed controller / repositories/ service Layer in spring boot
- Exposing /consuming Restful webservices.
- Developed view using JSP & JSP Tags
- Developed email sending services in Util Layer
- Fix of defects communicated by testing Team.
- Attend Daily stand-up meeting.

Education

- Post Graduate in Computer Application (MCA) – Netaji Subhash Engineering College, Kolkata (WBUT West Bengal)
- Graduation in Computer Application (BCA) -Marwari College Bhagalpur, Bihar(TMBU Bhagalpur Bihar)

Key Projects:

- **C2QF (Copper to Quantum Fiber):** Built microservices architecture for telecom service migration, enabling thousands of users to upgrade seamlessly from copper to fiber broadband. Integrated Spring Batch for bulk data processing and AWS for scalable deployment.
- **BDOPay 2.0:** Developed secure, high-performance backend APIs for one of the largest banks in the Philippines, supporting millions of daily transactions. Leveraged Docker, Kubernetes, and AWS for containerized cloud deployment with improved uptime and scalability.

Key Achievements

- Reduced bugs by **14%** by improving code quality with **SonarQube and Junit5**.
- Enhanced backend system performance and reduced downtime by **20%** via **DB/API optimization**.
- Reduced API response time by **30%** through optimized query handling and caching strategies.
- Increased system **scalability and availability** by migrating core modules to **microservices on AWS (Docker + Kubernetes)**.
- Improved system stability by automating production monitoring and incident response, cutting downtime by **20%**.
- Successfully delivered enterprise **banking & telecom projects (BDOPay 2.0, C2QF)** in Agile teams of **7–16 members**, ensuring 100% client satisfaction.

Mentored junior developers and contributed to code reviews and best practices, raising overal
